

MAGIKA

1:8 OFF-ROAD RACING BUGGY

Un nuovo ed entusiasmante OFF-ROAD da competizione va ad aggiungersi alla già collaudata linea MANTUA MODEL che, da anni sta proponendo ai modellisti di tutto il mondo il meglio dell'1:8.

Per le sue caratteristiche tecniche, semplicità di montaggio e regolazioni, la MAGIKA è destinata a rimanere parecchio tempo sulla breccia, e ne fa il modello da battere degli anni '90. La linea armoniosa ed elegante, la facilità di guida e le brillanti prestazioni, la rendono senz'altro l'OFF-ROAD del momento.

A new and fascinating competition OFF-ROAD car is ready to enter in the MANTUA MODEL legend.

The strong construction, the easy assembly and maintenance make the model a top car for any important race as well as for the amusement.

**Art. 24485
Kit telaio snodato
Knee chassis set**

La confezione comprende: il telaio completo, la piastra radio, l'ammortizzatore centrale e tutta la minuteria per il montaggio eccetto il gruppo rinvio sterzo.

The kit contains: the knee chassis, the new radio plate, the fifth shock absorber & the moulding parts except the steering linkage.

**Art. 24488
Kit ammortizzatore centrale completo
Central shock absorber set**

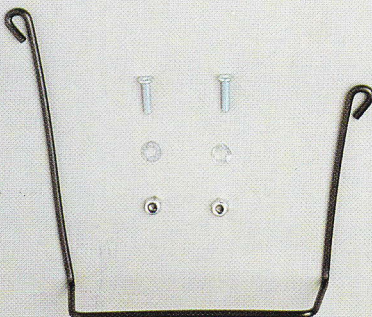

**Art. 24486
Kit tiranteria - Linkage set**

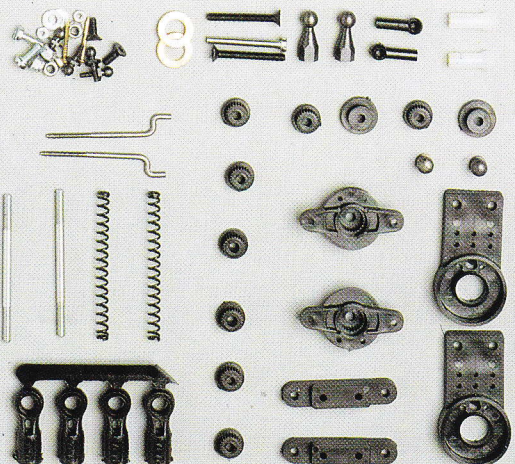

La confezione comprende: tutte le parti in nylon, uniball, tiranti dello sterzo e minuteria.

The kit contains: the nylon parts, the uniballs the rods etc.

**Art. 24487
Kit protezione laterale marmitta
Side muffler protection set**

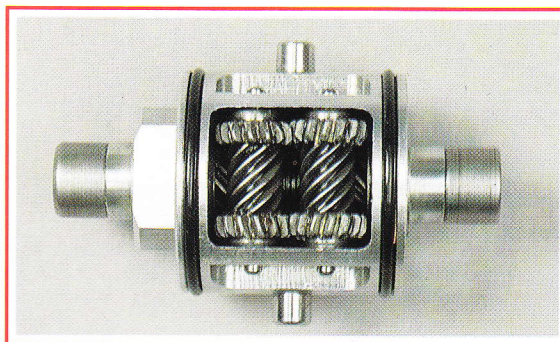

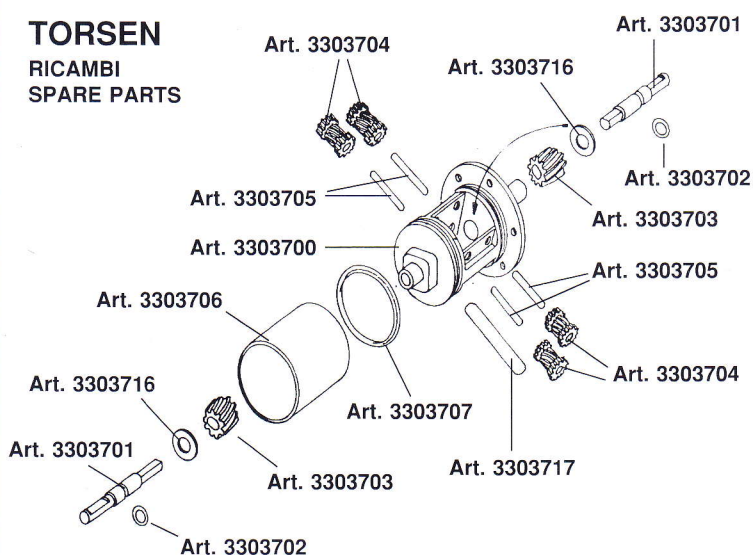

**Art. 24232
Kit supporto marmitta
Support muffler set**

ACCESSORI ACCESSORIES

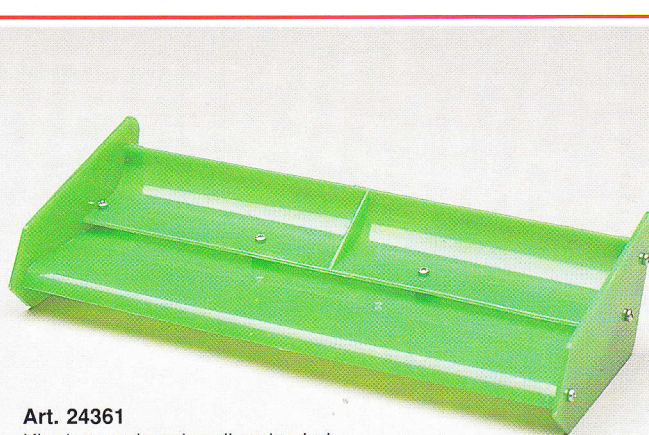

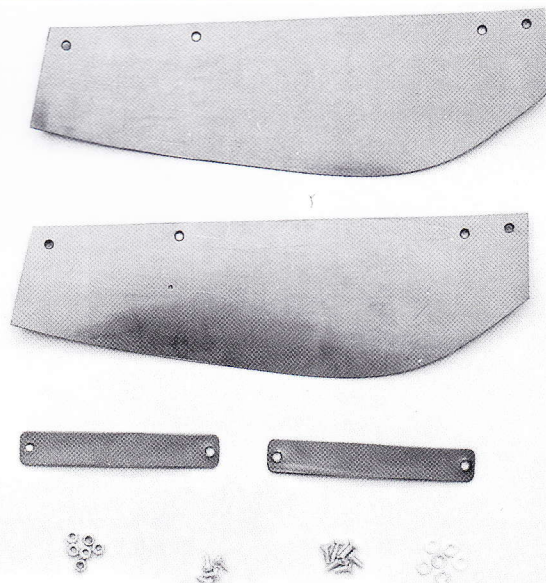

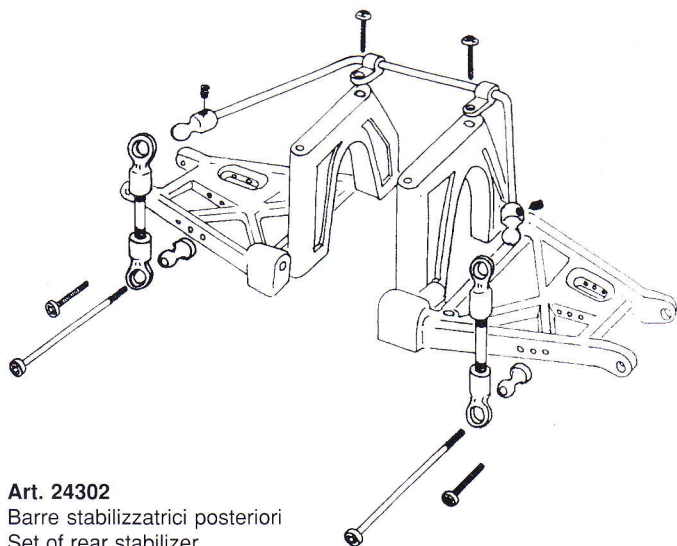

TORSEN RICAMBI SPARE PARTS

Art. 24215

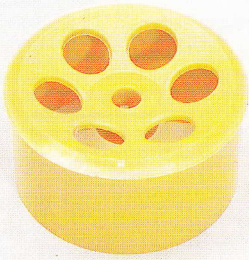

Il **differenziale TORSEN**, definito dai tecnici "intelligente", permette un maggior scarico di potenza sulle ruote evitando lo slittamento in uscita delle curve o dopo i salti fornendo sempre la stessa coppia ad entrambe le ruote. E' stato realizzato identico all'originale impiegato da Lancia, Lotus, Ferrari con la sola eliminazione di due viti senza fine. Siamo gli unici al mondo che producono un simile differenziale.

The **TORSEN differential**, called "clever unit", guarantee the automatic distribution of the power on each wheel in any circuit condition. This device is a scale copy of the Ferrari - Lancia - Lotus differentials with two pairs of endless screws instead of three for space problems.
